## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-5, 10, 13-21, 24-26, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashimoto et al. USP 5,836,737.

See the attached marked up drawing figure 4 of Hashimoto et al. depicting the claimed features. Hashimoto et al. teach the claimed invention except for removing the tray from the rotatable members. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the device of Hashimoto et al. in a reversing fashion as it is well known to utilize such devices for loading and unloading, or stacking and unstacking, and the mere claiming of being able to use a device in one or both directions is well within the level of ordinary skill in the art. Furthermore, it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Einstein*, 8 USPQ 167.

### ***Allowable Subject Matter***

3. Claims 6-8, 22, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3651

4. Claims 11, 12 and 27-30 are allowed.

*Conclusion*
